GAMMON POND

Freeman Twp. and New Portland,
Franklin and Somerset Counties
U.S.G.S. Strong, Maine (7½')

Fishes

Yellow perch
Chain pickerel
Minnows
Fallfish (chub)

White sucker
Hornpout (bullhead)

Physical Characteristics

Area - 97 acres

Maximum depth - 12 feet

Principal fishery: Chain pickerel

Temperatures:

Surface - 67°F

9 feet - 66°F

Gammon Pond is located northeast of Taylor Hill. An inlet enters the west side of the pond and its outlet flows east from the north end into Lemon Stream. The pond's shoreline is mostly undeveloped.

Water quality in Gammon Pond is not suitable for coldwater gamefish. Water temperatures are warm at all depths during the summer months in this shallow pond. Chain pickerel and yellow perch thrive under these conditions and provide anglers with fishing opportunities. The pond is not stocked.

Gammon Pond is accessible via a road off Route 27. The pond is open to fishing under general law in both the summer and winter seasons. See the lawbook for additional regulations.

Surveyed - September, 1966
